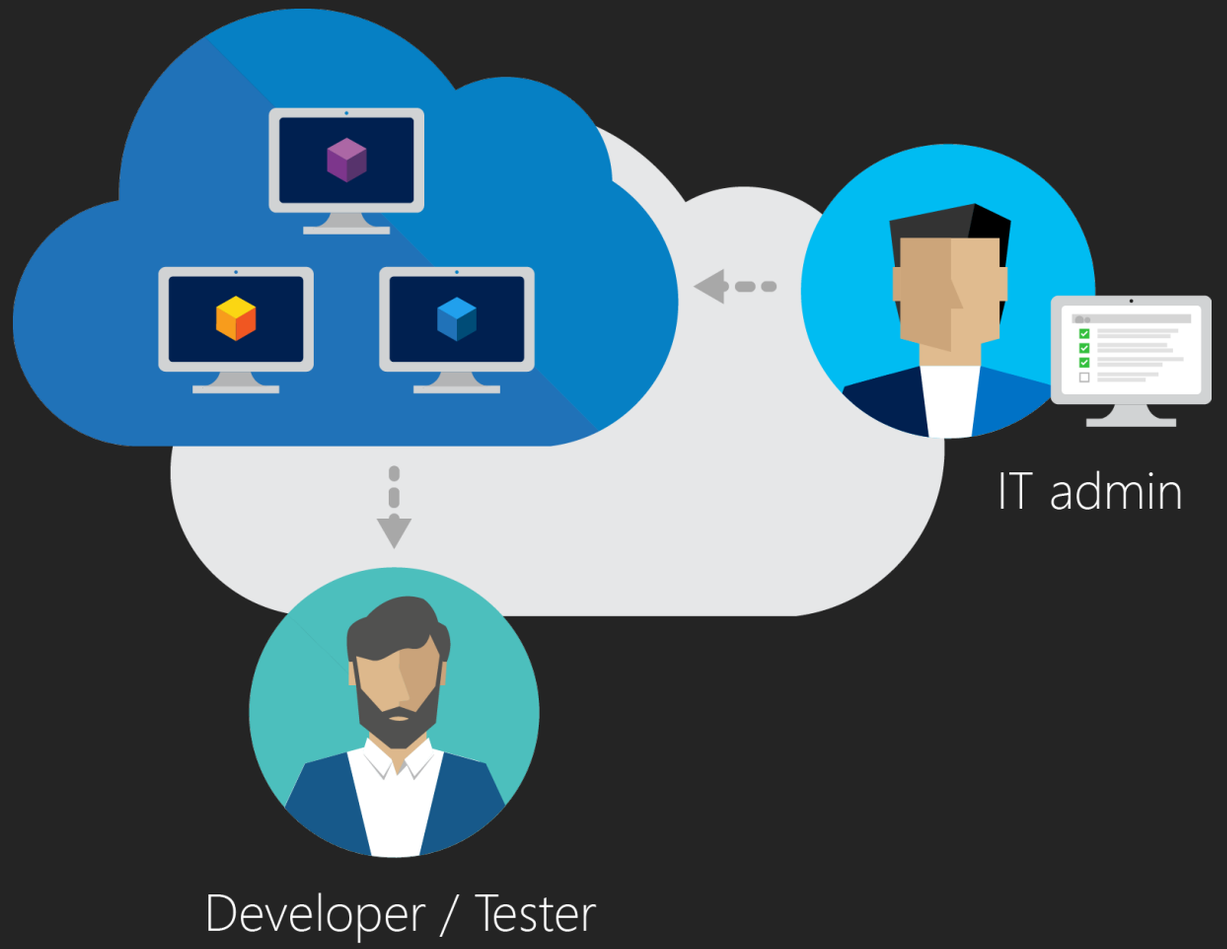
Performance

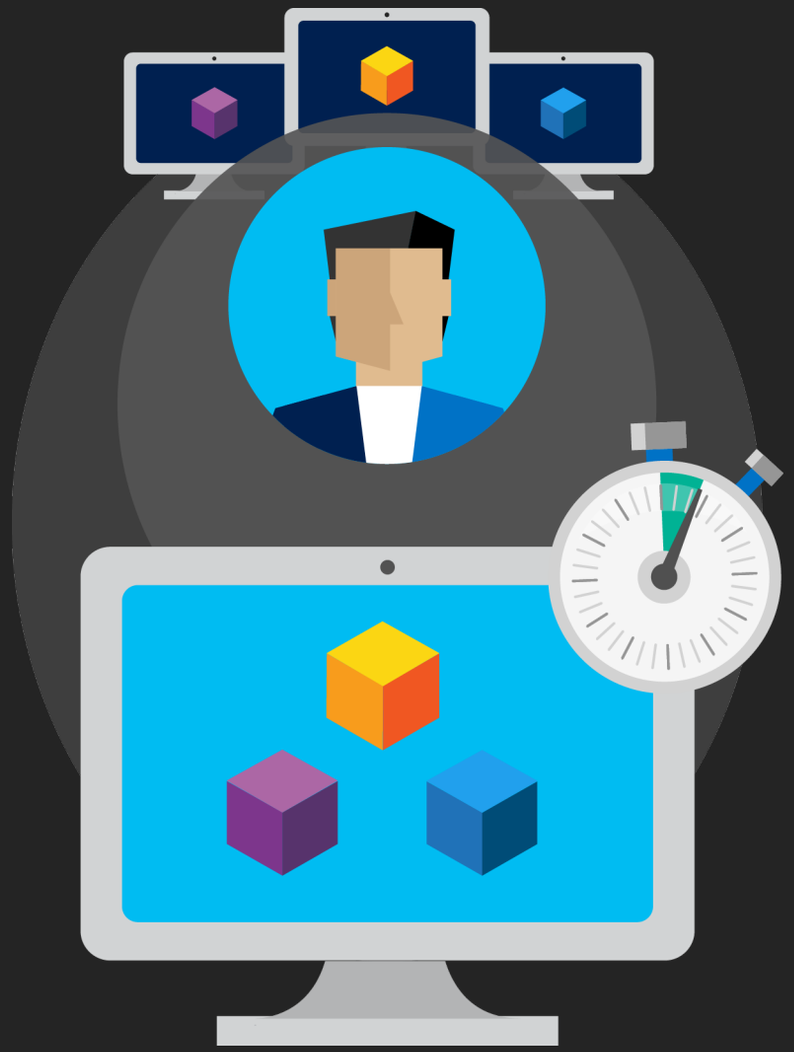
Worry-free self-service

- Provision environments with allocated quotas and policies
- Control costs
- Track project spending



Fast provisioning

- Pre-provision environments
- Claim an environment and start working immediately
- Use containers



Create once, use everywhere, by everyone

- Create templates once
- Share templates within your team
- Test environments easily

Integrate with your existing toolchain

- Leverage premade plug-ins or API
- Dev-test from preferred CI tool
- Use command line tool
